Distinguished Experience

At Owens Specialty we offer services specializing in heavy steel fabrication, maintaining superior quality throughout the process. We have the experience and equipment to handle projects across a variety of industries such as oil and gas, air filtration and silencers, and petro chemical.

We have been serving companies in these industries since 1975. Some of those served include General Electric, National Oilwell Varco, Nabors Offshore, Aker Solutions, and Solar Turbines. At Owens, we understand the power of a name and we proudly stamp ours on all our products. We know that in order to succeed, the customer product must be flawless, and that is our ultimate goal; the success of the products we fabricate for our customers.

Quality

At Owens, we seek out individuals who have the desire to produce reliable products. Quality output does not just apply to the work we produce for our customers, but across a spectrum of aspects of our business. Firstly, our facility is our home, and we treat it as such. A clean, safe working environment is the first step in a quality operation. Second is our customer service. We have an open door policy and take pride in being able to go above and beyond for our customers. Customer satisfaction is extremely important to us. Lastly is the product itself. Since 1975 we, as well as our suppliers, have strived to fabricate products that both we, and our customers can be proud of. We have an API Q1 (Cert #2158) and ISO 9001:2008 (Cert #2246) certified quality system. We also hold certifications from ASME for the “U” Stamp (Cert #43,555) and NBBI “R” Stamp (Cert #R-8926).

Some of the products we have manufactured are turbine and generator bases, turbine generator air filters, inlet silencers, numerous skids and platforms, process decks, mast stands, crowns, mud tanks, hydraulic tanks, vent houses, capping beams, engine houses and industrial heat exchangers. Our capabilities do not stop with our past experiences. We strive every day to look for new opportunities to grow and learn.

Turbine/Generator Base

Crane Support Trusses

Industrial Heaters

Waste Heat Recovery Unit

SCOPE OF WORK:

We are equipped to handle fabrication of: Carbon Steel, Aluminum, Stainless Steel and most Alloys.

Below is a partial listing of satisfied customers we have performed work for:

1. Nabors Drilling
2. Precision Drilling
3. Transocean Offshore
4. Oceaneering
5. Donaldson Co., Inc.
6. Solar Turbine
7. Exxon
8. Fluor Daniel
9. /Altair/ClarcorIA
10. Pacific Drilling
11. Atwood Oceanics
12. Aker Solutions
13. Champion International
14. Uniflux/Exotherm Corp.
15. Bucyrus International
16. Jacobs Engineering Group
17. Arco Chemical
18. WFMS, Inc..
19. National Oil Well/Dreco
20. ABB Seatec
21. Air Guard
22. Global Marine
23. Kem-Tron Technologies
24. General Electric

We have 71,200 sq. ft. of enclosed facilities on five acres of stabilized land, which we own in Channelview, Texas at 16014 Bear Bayou Dr. We have been in these facilities since April of 1980 and the company has been in operation since 1975. Among our key employees we have at this time, some are 30-year veterans in steel fabrication.

Equipment

Part of doing a high quality, reliable job is having the right tools to use. At Owens, we stay on the cutting edge of technology with CAD operated cutting tools and well trained employees. We have 71,200 sq. ft. of enclosed facilities. We have over-head cranes in each building ranging from 25-ton to 5-ton capacity. With a lifting height of 30 ft. and a capacity of 100,000 lbs., we can complete a variety of large lifting tasks.

Our Fabrication equipment ranges from multiple MIG and TIG welding machines to light machine tools to sheet metal and plate equipment; including a 40ft. and 20ft. high definition plasma, CNC controlled, cutting tables. For a complete list of our equipment and management personnel, feel free to email or call and we can provide you with the complete list. With the combination of our equipment and staff, any project that comes through the door will receive the attention and treatment it deserves.
